

SmartBloom AI

Language Intelligence Company

Building the Language Intelligence Infrastructure for the AI Era

Investor Deck 2026

Confidential

Why Now

Every computing revolution begins with a new language interface.

Paper

Keyboard

Touch

AI

Language
Intelligence

AI understands language. Humans need better ways to express, search, learn and interact with it.

Company

SmartBloom AI is a Language Intelligence Company.

20+

years of language
technology

97%+

handwriting accuracy

20K+

Chinese characters

7

target platforms

From input method to language intelligence infrastructure.
SmartBloom builds proprietary engines for language input,
recognition, retrieval, knowledge and edge interaction.

Language Intelligence Stack

One technology stack. Multiple products. Future intelligent devices.

SmartInput Engine

AI-native language input

Handwriting Engine

Traditional ML and Transformer

SmartSearch Engine

Language intelligence retrieval

Knowledge Engine

NLP, RAG and Agent

Edge AI Engine

C++ native and RK3588

Cross Platform Engine

Windows, macOS, Linux, Android, HarmonyOS, iOS

20+ Years of Language Technology

A continuous technology route from input to intelligence.

Not an AI startup story. 20+ years of continuous R&D.

SmartInput Engine

The foundation of language input.

Pinyin

Chinese phonetic input

Prediction

Context-aware suggestions

Correction

Typo and fuzzy input

AI Input

From text to intent

20+ years input technology. From IME to AI-native input.

Powering SmartInput, AI Keyboard and future language input SDKs

Handwriting Engine

From traditional machine learning to Transformer.

Traditional ML

Lightweight, mature, offline and deployable.

Transformer

97%+ accuracy, 20K+ Chinese characters and AI-native recognition.

97%+

accuracy

20K+

Chinese characters

3

future devices

Powered

devices: AI Pen · SmartPaper · AI Learning Device

SmartSearch Engine

Language intelligence retrieval for Chinese.

Full-text

Text search

Cross Platform Engine

One engine. Seven platforms.

Cross-platform runtime turns core language engines into consumer apps, enterprise solutions and intelligent devices.

Solutions

Core engines become products and vertical solutions.

Consumer

SmartInput

Education

SmartBloom

International Chinese

Zhihua Com-
panion

Developer

MassiveEdit

The same Language Intelligence Stack supports multiple markets and future language devices.

SmartInput

AI-native input platform.

Input Method

Pinyin, handwriting
and AI input

Cloud Dictionary

Personal and do-
main vocabulary

IME SDK

Future enterprise
and device integra-
tion

Powered by SmartInput Engine and Cross Platform Engine.

SmartBloom

AI learning platform for language education.

SmartBloom

Autonomous learning system for K-12 students

Zhihua Companion

International Chinese learning app with BLCU cooperation

AI Tutor

Personalized guidance powered by knowledge and agents

Powered by Knowledge Engine, SmartSearch Engine and Handwriting Engine.

MassiveEdit

Ultra-large text workspace for the AI era.

GB-TB

text processing

Fast

open and search

Index

large-scale data

AI Data

developer workflow

MassiveEdit is positioned as a developer tool for logs, datasets, corpora, code, and future AI data infrastructure.

Intelligent Language Devices

Same core technology. Different devices.

AI Key- board

AI-native input
device

SmartPaper

Paper meets AI

AI Pen

Every stroke
becomes intelli-
gence

AI Learning Device

Personal AI tutor

Powered by SmartInput Engine, Handwriting Engine, Knowledge Engine and Edge AI Engine.

Business & Vision

Build the Language Intelligence Infrastructure for the AI Era.

Software

Consumer
