

SmartBloom AI

Language Intelligence Company

Building the Language Intelligence Infrastructure for the AI Era

Why Now

AI understands language. Humans need better ways to express, search, learn and interact with it.

Every computing revolution begins with a new language interface.

Paper

Platforms

“Deep language technology is built over years, not prompts.”

Language Intelligence Stack

One technology stack. Multiple products. Future intelligent devices.

Every product is powered by the same stack.

Technology Evolution

From input method to language intelligence infrastructure.

“Not an AI startup story. A 20-year technology evolution.”

SmartInput Engine

The foundation of language input.

From IME to AI-native input.

AI Input

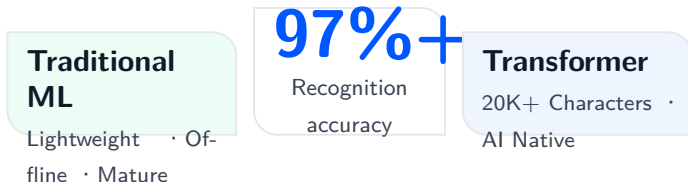

From text to in-
tent

20+

Years of input
technology

Handwriting Engine

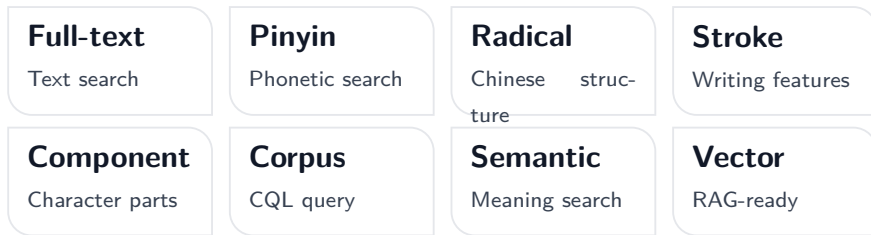

From traditional machine learning to Transformer.

“Every stroke becomes intelligence.”

SmartSearch Engine

Language intelligence retrieval for Chinese.

One engine. Multiple retrieval methods.

Knowledge Engine

From language resources to AI agents.

Cross Platform Engine

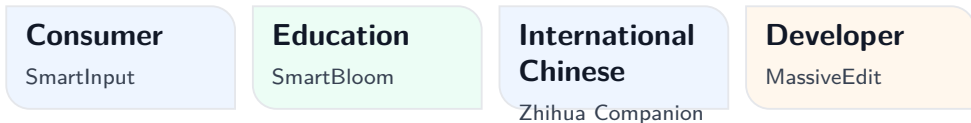

One engine. Multiple operating systems and devices.

“One runtime. Seven platforms.”

Solutions

Language Intelligence Stack turns into multiple business solutions.

“Products are applications of the same language intelligence stack.”

SmartInput

AI-native Chinese input platform.

Every input can become intelligent.
