Input method expertise · Chinese language resources · AI education · Edge interaction ·
Cross-platform runtime

SmartBloom starts from accumulated language technology, not from a single
AI demo.

Technology Moat

A full-stack language intelligence moat built over decades.

– **Language Data** resources and corpora

– **Input Engine** pinyin and prediction

– **Handwriting Engine** stroke-level recognition

– **SmartSearch Engine** multi-modal retrieval

– **Knowledge Engine** RAG and agents

– **Edge AI Engine** realtime interaction

Language OS

Input · Search · Knowledge · Agent
· Edge Runtime

Cross-platform, private deployment, realtime edge
AI and AI-native applications.

Founder

Built language technologies used by hundreds of millions of users.
