SmartBloom AI

Investor Deck 2026

One technology stack.

Multiple products.

Unlimited AI applications.

Language Input Engine

Intelligent Chinese input across every platform.

Pinyin

Accurate Chinese phonetic input
with intelligent correction

Handwriting

Online handwriting input and
recognition

AI Input

From text entry to intent-aware
interaction

Native

C++

SDK

Embeddable

Offline

Ready

Cross

Platform

One input engine. Multiple input methods. Every major platform.

Handwriting Engine

From pen strokes to Chinese characters.

Stroke Sequence

Captures online handwriting trajectories and pen states

Recognition Model

From lightweight models to Transformers

Large Vocabulary

Supports high-coverage Chinese character recognition

Online

Handwriting

20K+

Characters

97%+

Accuracy

Transformer

Model

From handwriting input to AI-powered writing, education and paper-device applications.

SmartSearch Engine

Hybrid retrieval for language intelligence.

From Chinese-specific queries to hybrid retrieval, then into RAG and agent workflows.

Knowledge Engine

Powering RAG and intelligent agents.

LANGUAGE RESOURCES

SmartSearch

Knowledge retrieval

Digital Human

Interactive service

Enterprise AI

Private deployment

Edge AI Engine

Private and real-time AI at the edge.

Digital Human

Voice and avatar interaction

Real-time AI

Low-latency on-device inference

Private AI

Secure local deployment

Native

C++

Cross

Platform

Edge

Deployment

Offline

Ready

One runtime powering digital humans, AI terminals and edge intelligence.

SmartRuntime

Deploy once. Run everywhere.

Supported Platforms

Windows

Desktop

macOS

Desktop

Linux

Server/Desktop

Android

Mobile

iOS

Mobile

Embedded

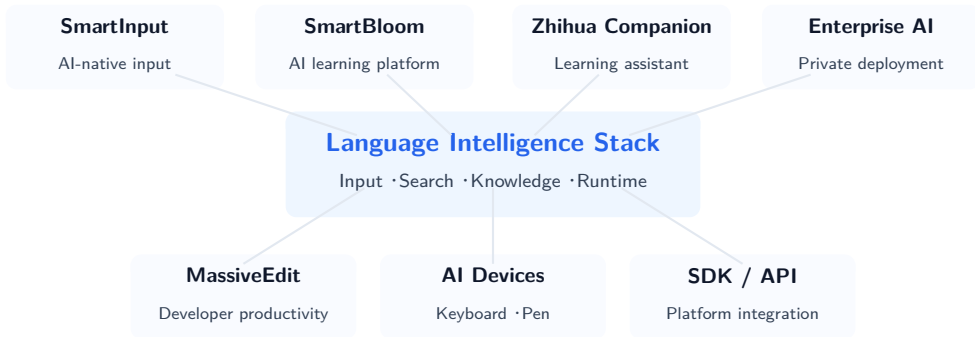

RK3568/RK3588

SmartRuntime

Cross-platform runtime for language intelligence applications

Solutions

Technology assets become products, services and devices.

SmartInput

The next-generation AI-native keyboard.

AI Keyboard

Natural language interaction
with AI

Chinese Input

Pinyin, handwriting and voice
input

Cross Platform

One experience across every
device

Built on SmartInput Engine and SmartRuntime.

SmartBloom

An AI-native platform for Chinese language learning.

AI Tutor

Personalized language learning

Practice

Reading, writing and speaking

Teacher Tools

Teaching and assessment
support

One platform connecting students, teachers and AI.

MassiveEdit

AI-native editor for massive text and data.

Open

GB–TB text files

Process

Clean and transform

Prepare

AI-ready datasets

GB–TB

Scale

Instant

Open

AI

Dataset

Developer

Tool

Built for AI data engineering and knowledge preparation.

The Last Missing Modality

AI still doesn't understand writing.

- ✓ Language
- ✓ Vision
- ✓ Speech
- ✓ Video
- ✓ Physical World
- **Human Writing**

**The next foundation model
will understand writing.**

Writing Intelligence

Built on our language intelligence platform.

Writing Foundation Model

Beyond Recognition. Toward Understanding.

Writing Knowledge & Data

Knowledge and corpus power the foundation model.

Structured knowledge and real writing data form the model's core assets.

Writing Intelligence Platform

One foundation model. Flagship product: AI Writing Coach.

AI Writing Coach

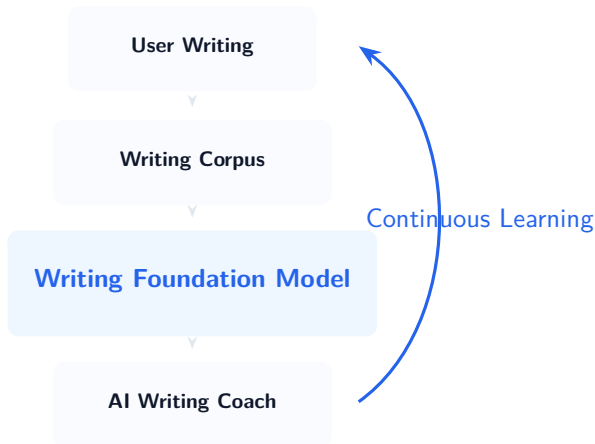

Not just scoring. Continuous guidance.

From “right or wrong” to “what to improve next.”

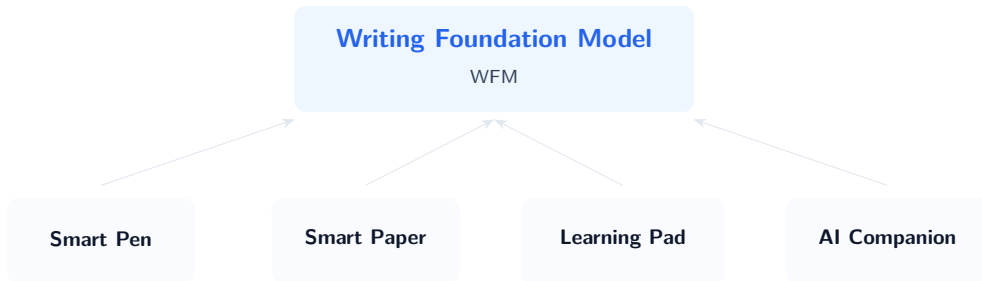

Continuous Evolution

Every writing session strengthens the flywheel.

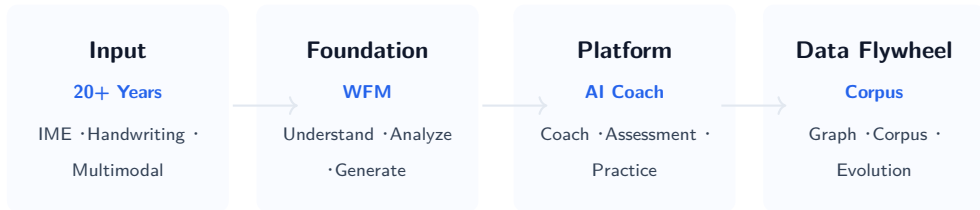

AI Learning Devices

AI in real learning scenarios.

Writing Intelligence Moat

Four pillars. A position others cannot easily replicate.

Input expertise + foundation model + platform + data flywheel = durable moat.

From Technology to Business

Writing intelligence opens a clear path to revenue.

Technology

Writing Foundation Model
Knowledge & Corpus
20+ years input expertise

Products

AI Writing Coach
Smart Learning Devices
Education Platform

Revenue

Education SaaS
Device & Services
Platform Licensing

One foundation model. Multiple products. Recurring revenue streams.

Business Model

Writing intelligence adds high-value revenue streams.

WHO PAYS

Universities

Chinese education

WHAT THEY BUY

AI Writing Coach

Subscription

Education SaaS

Annual license

Smart Devices

Hardware + service

Platform API

WFM licensing

Software subscriptions first. Devices and platform licensing scale the business.

Go-To-Market

Growing from a focused niche to a global AI platform.

Initial Market

International Chinese education

Long-term Vision

Global language intelligence

Start with writing intelligence in education. Scale through platform and devices.

Market Opportunity

Writing intelligence meets multiple high-growth markets.

Education & Writing

AI Writing Coach
Handwriting & calligraphy learning
Smart learning devices

Enterprise AI

Private knowledge and AI assistants

Language AI

Input, retrieval and language intelligence

Edge AI

AI-native devices and local inference

SmartBloom AI

SmartBloom AI

One platform. Writing intelligence as the next growth engine.

Investor Deck 2026

Why SmartBloom

Built for language intelligence.

Language First

From input and search to knowledge and intelligent agents.

End-to-End Stack

One technology platform from core engines to AI applications.

Cross Platform

One native C++ runtime across desktop, mobile and edge devices.

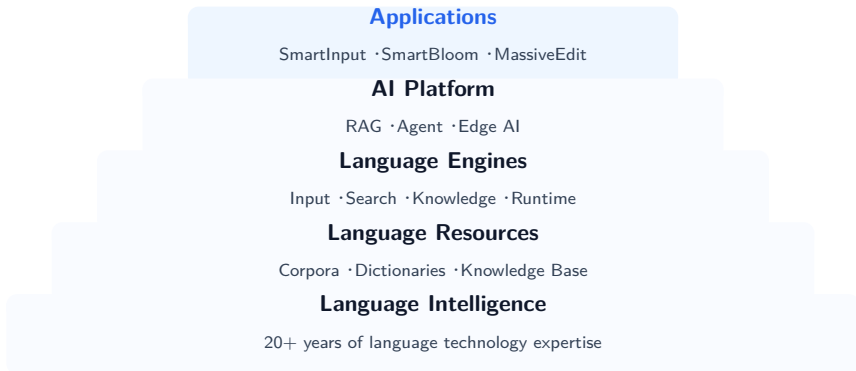

Edge AI Ready

Cloud and on-device AI deployment from the same platform.

Language intelligence is our long-term competitive advantage.

Technology Moat

Built layer by layer. Hard to replicate.

Validation

Built. Tested. Proven.
